Mkhululi Mtshali

Profile

I'm a Full-stack web developer trained at codeX where I built full-stack web apps, with unit testing that utilized mocha and chai, which increased code quality and reduced application bugs and breaks. Collaborated with engineers on group projects and established workflow using Github, engaged in daily remote learning through collaborative work using technologies including Google Meets, Slack, and Zoom.

Skills And tools

HTML, CSS, JAVASCRIPT
BOOTSTRAP SASS, ALPINEJS
EXPRESS, NODEJS
PostgreSQL, ElephantSQL, SQL
Handlebars
Git and GitHub, Terminal

Education

Full Stack Web Developer Certificate
Agile Web Developer
codeX | Feb2023-Dec2023

Certificate N3
Electrical Engineering Studies
Ekurhuleni West TVET College | Jan2017-Nov2017

Matric Certificate
IsiZulu, English, Mathematics, Life Orientation Geography, Life Science, Physical Science
Phumlani Secondary School | Jan2011- Nov2015

Work experience

Electoral Stuff
Electoral Commission of South Africa | Nov 2021 - Nov 2021

Issued over 1000 ballot papers both Local and Provincial and scanned over 500 voter IDs at the 2021 local government elections.

• Ensuring that all citizens who were to cast their vote were hand-sanitized and always wearing their masks. To protect against covid-19.

• Captured well over 100 spoilt ballots to ensure that the team was only counting valid ballots which made every party agent involved in my VD happy with the results.

Sales Team Member
COTTON ON-FACTORIE | Mall Of The South| Oct 2017 - Jan 2019

• Operate our point-of-sale (POS) with over 200 transactions a day• Prioritized a customer-friendly shopping experience through replenishing and merchandising products• This led to customer satisfaction and retention helping us with more sales.

Projects

Shoe-Catalogue-With-Api:

https://mkhululi97.github.io/shoe-catalogue-with-api/

Github Repository:

https://github.com/Mkhululi97/shoe-catalogue-with-api/tree/gh-pages

This project solves the logistical issues for inventory on hand for small e-commerce store owners. By allowing store owners to order inventory before it runs out to ensure product is always on hand but overbuying does not occur.

Tech Stack(client-side) html, css, alphinejs deployed at gh-pages.

Tech Stack(server-side) nodejs, expressjs, elephantSQL deployed at render.com

Github Repository:

https://github.com/Mkhululi97/rest-countries-api-with-color-theme-switcher

Rest-Countries-Api-With-Color-Theme-Switcher:

https://mkhululi97.github.io/rest-countries-api-with-color-theme-switcher/

Integrate the REST Countries API to pull country data and display like it in the given design. This projects allow users to see all countries from the API on the homepage, search for a country, filter the countries by their region, to click on a country to get detailed information about that country, click through to the border countries on the detailed page and also features dark/light mode toggler.

Tech Stack(client-side) html, css, alphinejs deployed at gh-pages.
